PROFILE

I am an MTech software engineer graduate in the Department of computer science from VIT Vellore. I am currently working as Software Engineer in JIO. I am also a Tutor with passion and love to help others with the knowledge I have. I love to explore new technologies and keep myself updated.

I love working with Data and automation, and spend a lot of my time in engineering and automating different tasks I possibly can.

SKILLS

- PYTHON
- DJANGO
- CI-CD
- REACT
- ELK, PROMETHEUS

EXPERIENCE

SOFTWARE ENGINEER (JIO)

AUG 2019 - PRESENT

I am working in the Applications and Automation team for JIO:

1. Full-stack application development project (ROM).

Backend: **Django**, Front-end: **React**.

2. Building Log Aggregation Tool for entire JIO and AJIO with "**ELK**" on **JIO Cloud** and currently handling cluster with 28TB data.

SOFTWARE ENGINEER – INTERN (SAP)

JULY 2018 – JULY 2019

1. JIRA – ID validation for every commit made by developer. Used Python.

2. CHATBOT using conversational AI

3. Integrated GIT data with JIRA data to correlate and get useful insights out of it. Awards (Honor Award: Best performer of the Project ML_FICA Project)
